Module 6 Report Practical Assignment

Introduction

This assignment goal is to learn how to create an App Widget based on the hands-on tutorial of Module 6.

Assignment:

For the hands-on tutorial, it shows step-by-step how to create an app widget that shows the word example as white text on blue background. In our assignment, we will need to redo the entire hands-on assignment but after applying the following changes:

- When you create a new Android project. Call it MyFirstAppWidget.
- Change the minimum width (cells) to 3 and minimum height (cells) to four.
- Change EXAMPLE word to: "Welcome Home".
- Change the color of Welcome Home to any color other than white.
- Change the background to any color other than blue and **not** the same color that you have selected for "Welcome Home" message.

Submission Requirements:

- Create a report of your project. Explain the details of what you did exactly. Run your code and insert your clear screenshots that show the results of your run.

Due Date:

02/28/2020
Note: 10% penalty will be applied for late assignment submission
